

JOST high performance lubricant

Advantages

- Minimum lubricant consumption
- Maximum performance
- Less environmental impact
- Temperature resistant, with high adhesion to metal surfaces
- Fully synthetic

Application

- Prescribed for refilling the JOST LubeTronic 5Point
- Ideally suited to the manual lubrication of all fifth wheel couplings

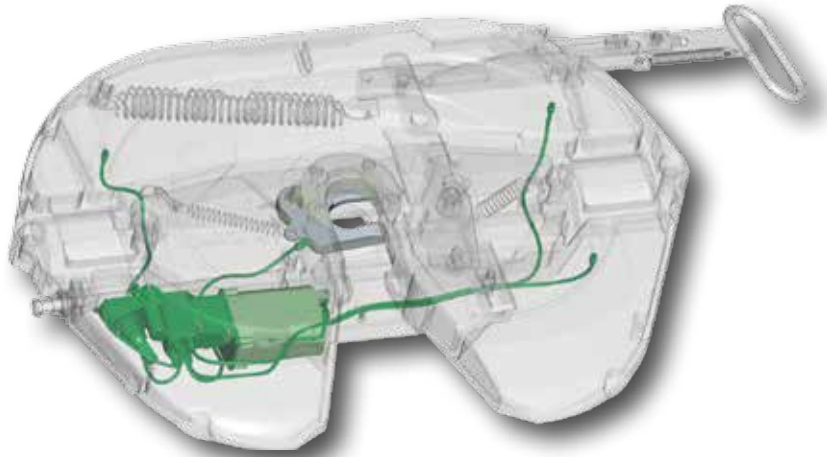

LubeTronic refill kit

- Item No. SKE 005 670 000
- Consists of two cartridges
- Grease sufficient for one refill

Barrel

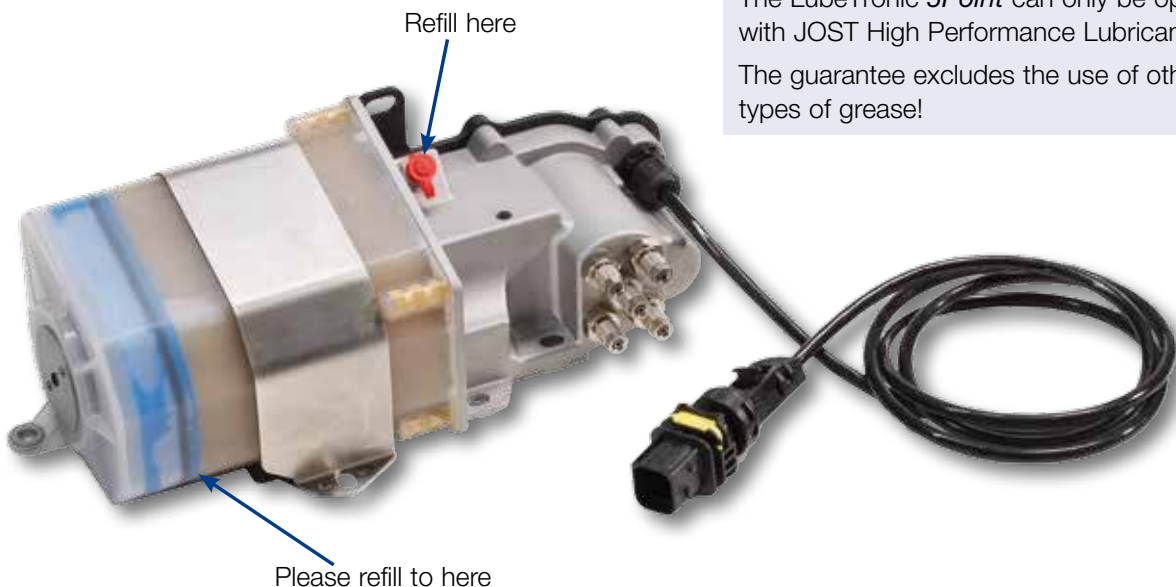

- Item No. SKE 007 090 000
- Content sufficient for refilling 35 LubeTronic units

LubeTronic 5Point

- LubeTronic 5Point is a central lubrication system for fifth wheel couplings.
- The quantity of grease dispensed remains constant, providing reliable lubrication for the fifth wheel coupling plate and the lockjaw (after initial greasing).
- Lubricant dispensing intervals for fifth wheel coupling can be set for use in:
 - long distance haulage – 1 year
 - construction traffic – 6 months

Note on refilling

The LubeTronic 5Point can only be operated with JOST High Performance Lubricant
The guarantee excludes the use of other types of grease!
